Mesh and Solid Safety Covers

We make our covers stronger to keep your family safer.
A Coverstar mesh or solid safety cover is the strongest way to prevent children and pets from getting into your pool when you can’t be there. Custom-built to perfectly fit your pool and manufactured from best-in-class materials, a Coverstar cover is the best protection available for your family and your pool investment!

We make it strong...to keep your family safer!
The stronger the cover, the safer the cover. Coverstar applies exclusive, patented design and manufacturing innovations to give our mesh and solid safety covers unmatched strength and durability.

We make it easy...to install and maintain.
Unique features such as our extra-long installation tool make it fast and easy to install and remove your Coverstar cover. All Coverstar covers help keep debris out of your pool, and virtually block all sunlight – so you save on chemicals and enjoy cleaner water when you open your pool.

A Coverstar Safety Cover eliminates this ugly, dangerous mess from your backyard!

So many reason why a Coverstar safety cover is your safest choice.

Ovals, kidneys, even pools with custom shapes, raised walls, stairs, rails or water features—we’ll create a Coverstar cover that will cover any pool beautifully and safely.
So many reasons why a Coverstar safety cover is your safest choice

Interlocking Seams for Extra Strength!
A safety cover is only as strong as its seams, potentially its weakest point. Only Coverstar uses interlocked and double overlapped seams to dramatically improve weight transfer from the cover material to the seams and webbing. There’s simply nothing stronger.

UV Resistant Thread
Our extra-durable thread resists sun damage and pool chemicals.

Double Reinforcement
To provide additional strength for high-stress areas, we use bar and box tack* reinforcement on all perimeter straps—a Coverstar exclusive.

Custom Heavy-Duty Hardware
All 9000MX, 7000MS and 1000V series covers come with our low profile, heavy duty double springs. D-rings ensure your cover lies flat and fits tight for optimum safety while corrosion resistant brass anchors provide the ultimate combination of strength and durability.

Double Decker Edge
The perimeter of most covers can fray and unravel. Our cover material is first hemmed, then sandwiched between double layers of webbing around the perimeter, so the edge can’t unravel.

Less Wear and Tear
Heavy duty vinyl nosing pads protect the cover against wear from coping and steps.

Webbing Won’t Abrade
Chafing strip sewn to bottom of cover protects the cover webbing from coping abrasion wear—and won’t mark the coping, like other strips.

The professional Coverstar team will help you select a cover with the performance and features that best meet your needs!

*This photo shows the bar and box tack stitching highlighted for illustrative purposes. All web stitching is black.
Stainless Steel Flush Wall Anchor
The SS flush wall anchor is pushed in and tightened after the cover is removed. This provides a clean look as the anchor head remains flush with the raised wall.

Snap-On Perimeter Padding
The Snap-On Perimeter Padding can be installed in specific locations to protect the cover from chaffing damage. The padding easily snaps onto the webbing and can be cut to size as needed.

Coverstar Exclusives

So many NEW reasons to buy a Coverstar cover

The right cover to fit your needs... and perfectly fit your pool

Coverstar offers mesh covers for maximum drainage and solid covers that block 100% of sunlight—in a variety of material weights and colors. All can be custom designed to fit any size or shape pool precisely, including any special features such as raised walls, diving boards, stairs and rails.
