

NOW AVAILABLE

www.lathamEZmeasure.com

How does it work?

- 1 Download the app and load your preferences in the menu screen
- 2 Create a job
- 3 Input measurements
- 4 Review and Export

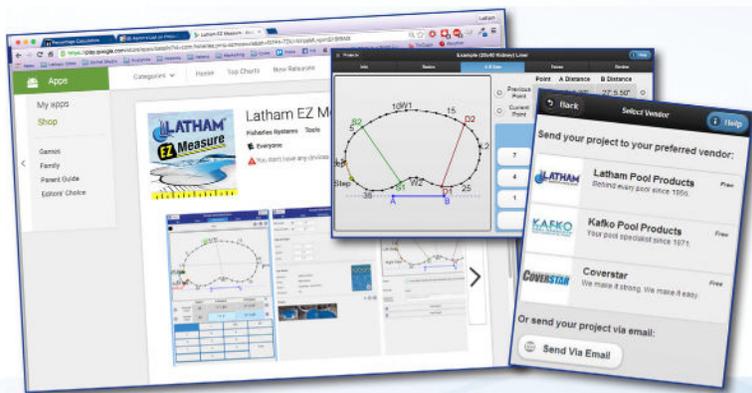

Features:

- 1 Uses A-B triangulation method for measurement data. Includes review screens with intelligent warnings as well as real time visual plot data measurements.
- 2 Data entry pages are tailored to the specific needs for pool liner and safety cover measurements; along with the ability to upload photos of special features or obstructions.
- 3 Once you've downloaded your app, no cell service is required to create a job and measurements. Saved jobs can be exported to Latham for quoting and ordering when cell service or WiFi is available.
- 4 Designed for the Apple® iPad®/ iPhone®, Android™ smartphones and tablets, and for PCs and Macs via a Chrome™ web app.
- 5 Customize your Latham EZ Measure app depending on how you purchase liners and safety covers. Go to the main menu and select preferences to custom tailor your measuring program.

Benefits:

- 1 The Measuring App is designed to help avoid common measurement issues. The review screen will help catch common issues and oversights.
- 2 Tailored data entry pages help with fewer questions and saving time. Photos help Latham Designers to accurately design and build the best fitting Liner/Safety Cover possible.
- 3 Latham EZ Measure allows you to work off line and save jobs with no cell service or WiFi. Saved jobs can be exported to Latham for quoting and ordering once cell service or WiFi is available.
- 4 Latham EZ Measure allows you to use your preferred device for taking measurements.
- 5 Easily customize your Latham EZ measure app for your own personalized features using the app preferences menu.
